Report on the Census of Newfoundland and Labrador, 1911.

To His Excellency Sir WALTER EDWARD DAVIDSON,
Knight Commander of the Most Distinguished Order of St.
Michael and St. George, Governor and Commander-in-
Chief in and over the Island of Newfoundland and its
Dependencies.

MAY IT PLEASE YOUR EXCELLENCY;—

I have the honour to submit the following Report upon the Census of 1911:—

1. This Census was taken under Cap. 27, Consolidated Statutes (Second Series), which provides that the population of the Colony shall be enumerated in every tenth year between the months of June and December.

2. Preparation for the work of the Census was commenced in the fall of 1910, when forms were obtained from the United Kingdom, the Dominion of Canada and the United States of America, showing the information called for under the Census taken in those countries. From these forms were selected those items which would be of value in respect to this Colony. These items numbered 311, the particulars required in the Census of 1901 being 241. For the convenience of the Enumerators and the better preservation of the sheets they were made up in the form of books. Other necessary forms were drawn up and the Book of Instructions to Enumerators was prepared. As the Registrar General of the United Kingdom proposed to make a report on the Census of the British Empire, request was made that information which had not been supplied by our previous Census Returns should be asked for in the sheets for the Census of 1911. This necessitated the addition of new items and the taking down of the name and particulars of each person in the Colony. Previously the name of the head of each family only had been entered and in order to comply with the wish of the Secretary of State for the Colonies the forms were arranged so that individual particulars might be obtained. The Books, Forms and Instructions were approved by His Excellency the Governor in Council under Sec. 7 of the Census Act.

3. As in 1901 it was found impossible, within the short summer season of the Census year, to get full and accurate returns from Northern Labrador, forms were sent to Bishop Martin at Nain in August, 1910, so that, during

the winter, when all the people were gathered into the settlements, the necessary particulars relating to them might be taken. The sheets were returned in August, 1911, and for the first time we have a record of the sexes of the inhabitants of Northern Labrador.

4. As the Educational and Road Grants in this Colony are allocated to each section according to its population, the enumeration must take cognizance of the residence of the people. For example, when the Enumerators were at work many of the people were not at their homes, but were at Labrador or in other parts. The Enumerator, however, had to enter them in the returns for the settlement where was their place of residence. Special provision had, therefore, to be made in order to avoid duplication of entry, and the Revising Officers retained the sheets until the people returned home and the sheets could thus be checked. The provision of Sec. 4 of the Census Act, whereby a copy of the Return has to be furnished by each Enumerator to the clergyman of each religious denomination in his section, forms another check upon the Returns, for each clergyman sees that all his people are entered in the Returns or else makes the necessary representation to the Revising Officer, so that errors or omissions may be corrected.

A.—TOTAL POPULATION.

Taking the figures as shown by the Census sheets of 1911, the population stands thus:

Newfoundland	238,670
Labrador	3,949
	<u>242,619</u>

The following table may be of interest in this connection:

TABLE I.

Census of	Population of Newfoundland.	Population of Labrador.	Total.
1857	122,638	1,650	124,288
1869	144,386	2,150	146,536
1874	158,958	2,416	161,374
1884	193,124	4,211	197,335
1891	197,934	4,106	202,040
1901	217,037	3,947	220,984
1911	238,670	3,949	242,619

TABLE II.

The average percentage of increase per annum for the various periods dating from 1857 :

Period from	Average percentage of Increase per annum.	Average percentage of Increase on a ten years' basis.
1857-1869	1.49	14.90
1869-1874	2.02	20.20
1874-1884	2.23	22.30
1884-1891	.34	3.40
1891-1901	.93	9.37
1901-1911	.99	9.79

It is impossible to account satisfactorily for the low average rate of increase for the seven years from 1884 to 1891. There are no figures showing the births and deaths for that period, nor are there any returns of emigration.

The increase of total population in this Census over that of 1901 is 21,635, or 9.79 per cent., which is a slight increase on the percentage for the previous ten years.

From the records of Vital Statistics it is found that for ten years since the Census of 1901 there were 69,132 births and 39,299 deaths in the Colony. The excess of 29,833 would be the natural growth of the population, which, by these figures, should now total 250,817, being an increase of 13.5 per cent. for the ten years.

From the records of Emigration and Immigration during the ten years it is found that the loss to the population of the Colony by such means is 7,484 people, or about 3.4 per cent. of the population of 1901. Subtracting this loss from the population with natural increase added, we find that, according to the records of Vital Statistics and of Emigration, the present population should be 243,333.

By the present Census Returns it is found that the population is 242,619, thus showing but a small difference of 714 persons between the two methods of computation. This affords a real and valuable check upon the Census, and in the present instance proves that the Census has been correctly taken.

To recapitulate :—

The population in 1901 was	220,984
Add, natural growth for ten years, say 13.5 per cent.	29,833
Less, loss through emigration, say 3.4 per cent.	7,484
Balance added to population, say 10.1 per cent.	22,349
	<u>243,333</u>
Less, difference between Census Returns and returns of Vital Statistics and Emigration	714
Present population, as per Census Returns, 1911	<u>242,619</u>

The natural growth for the past ten years, 13.5 per cent., is 2 per cent. less than that for the previous ten years, which was 15.5. The loss by emigration, 3.4, is, however, just 3 per cent. less than the loss for the ten years between 1891 and 1901.

B.—POPULATION BY DISTRICTS.

The following Table gives the population of the various Districts by the 1911 Census, and also the figures for each District for former years:—

Grand Total	124,288	161,374	197,335	202,040	220,984	242,619

From Table III. it will be seen that the population of the Districts of Harbour Grace, Port-de-Grave and Harbour Main is less than it was ten years ago, the two former Districts having declined steadily since 1884. The Districts of Carbonear and Ferryland show a slight increase.

In Table IV., which follows, will be found the figures of the natural increase for each District during the past ten years and of the gain or loss by Immigration or Emigration. The figures of the gain or loss are obtained by simply adding the natural increase to the population of 1901 and subtracting therefrom the population of 1911.

The Table shows that the Districts of Twillingate, St. John's West and East, St. George and St. Barbe have gained by immigration. Twillingate District, no doubt, profits by the establishment of the town of Grand Falls with its paper-making industry, but the increase is only 533, showing that the District has lost some people by emigration. The District of St. John's has profited by the tendency of persons from other parts of the Colony to settle in the capital.

The largest natural increase, taken numerically, is found in the District of Bonavista, 2,911; followed by the District of Twillingate, 2,719; Trinity, 2,645; St. John's East, 2,460; St. George, 2,385; Placentia and St. Mary's, 2,071; and St. John's West, 2,015.

In Table V., which follows, will be found the actual numbers of the increase or decrease in each District by the Census of 1911, and the percentage of such increase or decrease compiled upon the population of the Census of 1901.

Also, compiled from the Returns of the Registrar of Vital Statistics, the percentage of the natural growth for each District, based on the Returns of Births and Deaths.

The — indicates a decrease.

Taking first the actual figures as shown by the 1911 Census, we find by Table V. that the largest numerical increase is to be found in the District of St. John's East. The increase of 3,623 is, however, but 16.8 per cent. on the population of 1901, which percentage is exceeded by the Districts of St. George and St. Barbe. The Districts of Twillingate, St. George, St. Barbe, Bonavista, and St. John's West, follow in the order named, having regard only to numerical increase; but, taking the percentage of increase on the 1901 Census, St. George heads all the Districts with the largest percentage of 30.3; followed by St. Barbe, 28.8; St. John's East, 16.8; Twillingate, 16.7; Fortune Bay, 14.0; Burin, 11.7; Bonavista, 11.3; St. John's West, 11.2; and Burgeo and La Poile, 11.1. Three Districts show a decrease in population, namely, Port-de-Grave, 6.1 per cent.; Harbor Grace, 5.9; Harbor Main, .3.

In comparison with the actual figures of the Census sheets we now take those of columns 5, 6 and 7 of Table V., which have been compiled from the Returns of Vital Statistics furnished the Registrar during the past ten years. The excess of births over deaths has been calculated for each District, and the percentage of the same computed on the population of the District in the Census of 1901. Had there been no immigration or emigration the population of each District would have simply been the natural increase added to the figures of 1901. The difference, therefore, between columns 4 and 5 will show to what extent each particular District has been affected, (a) by persons moving into the District, and, or (b) by residents of the District moving out of same.

St. George District shows the largest natural growth, 26.2 per cent. The Census figures show an increase of 30.3 per cent.; so that St. George not only retained the natural increment but received 4.1 per cent. from other districts in the Colony or from outside.

The District of St. Barbe follows with a natural increase of 21.8 per cent. and has not only retained the same but received 7 per cent. additional from other sources. It is most satisfactory to note that, as was the case in 1901, the two districts covering that part of the coast line known as the Treaty Shore make such a good showing. They lead the whole Colony in the percentage of increase, retain their people within their own borders and attract others beside.

The District of Burgeo and La Poile comes third in order with a natural growth of 20.7 per cent. Of this, 9.6 per cent. is lost through emigration or removal to other districts, leaving the net increase of 11.1 per cent. as shown by Census figures.

Fortune Bay ranks fourth with a natural growth of 18.3 per cent. losing 4.3 per cent. through emigration or removal, thus leaving a net gain of 14.0 per cent.

Burin has a natural increase of 16.4 per cent., losing 4.7 per cent., thus gaining 11.7 per cent. net,

Bonavista has a natural growth of 14.1 per cent., loses 2.8 per cent, by emigration and thus gains 11.3 per cent. net,

Twillingate has a natural increase of 13.9; has a gain by immigration of 2.8; thus receiving an increase of 16.7 per cent. This is, no doubt, caused by the establishment of the Grand Falls industry.

Placentia and St. Mary's follows with a natural growth of 13.6 per cent.; losing 7.7 by emigration or removal; thus showing a net gain of 5.9 per cent. All Districts up to this point show a greater per centage of natural growth than the average rate for the Colony, which is 13.5 per cent. Those Districts which follow are below this average.

The District of Trinity has a natural increase of 12.8 per cent., but, having lost 7.5 per cent. by emigration, retains only 5.3 per cent. as actual net increase.

Then follow Fogo, St. John's East, Harbour Main, Ferryland and St. John's West with about 11 per cent. natural increase. The Conception Bay Districts, Bay-de-Verde, Carbonear, Harbour Grace and Port-de-Grave come next with something over 9 per cent. natural increase.

Harbour Grace, Port-de-Grave and Harbour Main Districts all lose their natural increase and more beside.

To sum up: The showing made by Bay St. George, St. Barbe, Burgeo and La Poile, Fortune Bay, Burin, Bonavista and Twillingate is eminently satisfactory. St. John's District, with a lower natural increase, profits by the tendency of the people to congregate at the large centres of population. All the Conception Bay Districts continue to show the lamentable results of the emigration of the people, and, as it is the young men and the young women principally who are leaving the Colony, we see the effect in the lowering of the rate of natural increase, which is most strongly emphasized in the Conception Bay Districts.

The Table VI., which follows, makes comparison of the figures for 1911 with those of 1901 as respects natural growth, loss or gain, and net increase of population in each District:

Columns 2 and 3 show that, except in the case of three Districts, the percentage of natural increase is less than it was ten years ago. The Districts of Ferryland and St. John's East and West show a decided increase, while the District of Bay de Verde has a bare increase of .1 per cent. In some of the Districts the falling off is very great—that shown by the District of Twillingate is 7.6 per cent.; Fogo, 5.5; Placentia and St. Mary's, 4.9; St. George, 4.4; Burin, 4.2; and Trinity, 3.6. This is a most regrettable feature, and especially so because the cause of such is the emigration of our younger people. In the Conception Bay Districts the rate of natural

growth is practically the same as it was ten years ago. The only thing that has saved the Colony from a lower percentage of net increase to the population is the smaller emigration that has taken place. The percentage of natural increase is 2.0 per cent. less than in 1901, but the loss through emigration is almost 3.0 per cent. less than it was ten years ago, and this enables the Colony to show a slightly increased percentage of net gain.

All the Districts show less loss by emigration than in 1901, with the exception of Placentia and St. Mary's, which has turned a gain of .2 per cent. to a loss of 7.7 per cent.; Bonavista, which is worse off by 2.2 per cent.; Trinity, by .8 per cent.; Harbour Main, by .8 per cent., and Ferryland, by .8 per cent. It is encouraging to find that, whereas the loss through emigration ten years ago was 12,505 persons, it is only 7,484 persons during the ten years just closed.

A gain over the natural growth is found in the following Districts, viz.: St. Barbe, which shows 7 per cent. gain; St. John's East, 5.8 per cent.; St. George, 4.1 per cent.; Twillingate, 2.8 per cent., and St. John's West, .3 per cent. Columns 8 and 9 of Table VI. compare the percentage of net increase, and it will be observed that five Districts have a larger percentage of net increase than was the case in 1901, namely, St. Barbe, showing a greater increase by 7.3 per cent.; St. John's East and West, by 3.0 per cent.; Burgeo and La Poile, by 2.8 per cent.; Bay-de-Verde, by 2.6 per cent., and Twillingate, by .8 per cent. The following Districts, which showed a decrease last Census, have improved their position, namely,—Carbonear, which showed a decrease of 12.8 per cent., now shows an increase of 1.7 per cent.; Harbour Grace, which showed a decrease of 8.7 per cent., shows a decrease of only 5.9 per cent. in 1911; Port-de-Grave showed a decrease of 6.8 per cent., and for 1911 a decrease of 6.1 per cent., being a slight improvement; Ferryland, which in 1901 showed a decrease of 2.7 per cent., now shows an increase of 1.7 per cent.

The following Districts show a lower percentage of net increase, namely, Placentia and St. Mary's, by 12.8 per cent.; St. George, by 6.9 per cent.; Fogo, by 3.9 per cent.; Bonavista, by 3.8 per cent.; Harbour Main, by 3.7 per cent.; Burin, by 3.1 per cent.; Trinity, by 4.4 per cent., and Fortune Bay, by .2 per cent.

C.—POPULATION ST. JOHN'S CITY.

In the taking of the Census for the District of St. John's East and West, the sections were made to correspond with the Electoral Wards and not the Municipal Boundaries. From the Sheets, however, it is possible to take out the people who dwell within the City limits. The following Table gives the City population with the numbers of the various denominations;

St. John's West.....	17,214	8,650	3,475	3,801	620	459	120	89
St. John's East	15,078	7,303	3,901	2,753	133	610	271	107
	32,292	15,953	7,376	6,554	753	1,069	391	196

The population of the City ten years ago was 29,594, while now it is 32,292, an increase of 2,698 persons, or 9.0 per cent. This is slightly under the percentage of net increase for the whole Island, and five per cent, under the percentage of increase for the District of St. John's East and West. In 1901 the population of the West End of the City was 15,849, while the present population of the West End is 17,214, an increase of 1,865, or a percentage of 12.1. In 1901 the population of the East End of the City was 14,245 persons; it is now 15,078, being an increase of 833 persons, or 5.9 per cent. The percentage of increase in the District of St. John's West is 11.2, and as the percentage of increase in the west portion of the City is 12.1, it would seem to show that the City has received a larger increase than the outports, which, combined with the City form the District.

The percentage of increase in the District of St. John's East is 16.8, while the percentage of increase for the Eastern portion of the city is only 5.9. The increase, therefore, has been rather in the outports of the District of St. John's East than in that portion of the city which forms a part of that District.

D.—RELIGION.

Taken denominationally, the population of Newfoundland and Labrador is as follows:—

F.—THE SEXES.

Of the population of the Island of Newfoundland there are 122,578 males and 116,092 females as against 111,240 males and 105,375 females by the 1901 Census. That is, in 1901 there were 947 females to every 1,000 males, and in 1911 there are 947 females to every 1,000 males. There is therefore no change in the proportion of the sexes.

Taking Newfoundland and Labrador together, there are 124,630 males, and 117,989 females, which is 946 females to every 1,000 males.

The gains to the sexes in the Colony by natural increase have been as follows:

Male births during the ten years, 35,611; deaths, 20,433; gain to males, 15,178.

Female births during the ten years, 33,521; deaths, 18,866; gain to females, 14,655.

That is, by natural increase, there are 523 more males than females.

The loss to the sexes by emigration has been as follows:

Males who have left the country, 84,613; less those who returned, 80,057; loss to males, 4,556.

Females who have left the country, 31,174; less those who returned, 28,246; loss to females, 2,928.

That is, by emigration and immigration, there is a greater loss to the male sex than to the female sex by 1,628 persons.

This system of computation gives a smaller number of males and a larger number of females in the Colony to-day than the figures shown by the actual returns of the Census. The difference, however, is very slight in each case, and as some of the figures in the comparison have had to be estimated, the result is as close as could be expected.

We find in Labrador, out of the population of 3,949, shown by the Census figures of 1911, there are 2,052 males and 1,897 females; that is, there are only 924 females to every 1,000 males.

G.—CIVIL CONDITION.

In 1911 there were in the Colony 11,503 widowers and widows; 85,690 married persons; and 145,426 single persons. By the Census of 1901 there were 10,225 widowers and widows; 73,943 married persons; and 136,816 single persons, thus showing an increase of 11,747 married persons and 8,610 single persons than there were ten years ago.

H.—BIRTH-PLACES.

From the following Table it will be seen that the percentage of native-born inhabitants has increased with each Census. In 1857 they formed 90 per cent. of the total population; in 1869, 93 per cent.; in 1874, 95.2 per cent.; in 1884, 96.9 per cent.; in 1891, 96.8 per cent.; in 1901, 97.5 per cent., and in 1911, 98.6 per cent. During the same period the number of the old-time settlers from Ireland and the West of England has been dwindling, the tide of immigration being stayed. In 1857 these numbered 9.1 per cent. of the population; they now represent only .5 per cent.

J.—AGES.

There are in Newfoundland and Labrador:—

	Males.	Females.
Under 5 years of age	16,507	15,969
Between 5 and 15 years	29,378	28,488
Between 15 and 20 years	13,159	12,717
Between 20 and 70 years	81,975	57,135
From 70 years upwards	3,611	3,680
	<u>124,630</u>	<u>117,989</u>

From the above it will be seen that 47.9 per cent. of the population is under 20 years of age, while 7,291 persons are returned as being 70 years of age and upwards, or 3.0 per cent. of the whole population.

* Does not include the Treaty Shore or Labrador. † For Newfoundland only. ‡ Incomplete.

K.—INFIRMITIES.

We find by the present Census that there are 354 persons set down as deaf and dumb. These figures are less than they were ten years ago by 131 persons. There are 287 blind, as against 225 in 1901. Persons of unsound mind are reckoned as 664 in number, as against 352 in 1901. Altogether there are 1,305 persons suffering physical or mental infirmity, being 5.3 per 1,000 of the whole population.

The following Table makes comparison with the Census Returns of past years:—

While there are but 2915 persons who are put down absolutely as farmers, there are over 40,000 fishermen and others who cultivate land, more or less, in addition to their usual occupation. This class is largely made up of the fishermen-farmers, and, it is needless to say, that those who are assiduous on the land as well as on the sea generally manage to live in comparative comfort. The great bulk of our population is engaged in connection with the fisheries. The figures given in the 1911 Census, representing persons engaged in the catching and curing of fish, are higher than those of any previous Census, viz. :—43,795 males and 23,245 females, altogether 67,040 persons. This, of course, does not include members of their families, who are dependent upon them, but who are not engaged in the catch and cure of fish. The figures have varied in past years, both as regards number and percentage to the whole population. In 1857 31 per cent. of the total population were engaged in catching and curing fish; in 1868, 25.4 per cent.; in 1874, 28.4 per cent.; in 1884, 30.6 per cent.; in 1891, 27.1 per cent.; in 1901, 28.4 per cent., and in 1911, 27.6 per cent. At the present day the opening up of other industries in the Colony and the enticing fields of labor elsewhere are additional factors affecting the fisheries and those employed therein.

M.—EDUCATIONAL.

In the Census for 1891 there are returned 606 persons as teachers; in 1901 these had increased to 789; in 1911 a further increase to 1,395. Previous to 1891 teachers had not been recorded as such, while the returns as respects education were meagre. The following Table will give those particulars which are on record:—

The Census returns for 1891, 1901 and 1911 give more detail, as is shown in Table XVI.

From the above table it will be seen that there were 35,204 children between the ages of five and fifteen years attending school in 1901, as against 40,717 in 1911. The number of children between the ages of five and fifteen years not attending school in 1901 was 16,584 as against 19,823 in 1911. The total number of schools for 1901 was 783, and for 1911. 998. There was accommodation for 44,913 scholars in 1901, as against 56,439 in 1911. The number of children between five and fifteen years in 1911 was 60,540.

(a) This evidently includes others beside "children."

N.—FISHERIES.

The following Table gives such particulars as are recorded in the Census Sheets of past years. It will be noticed that in the early years the *tonnage* of vessels employed in the fisheries was quite as large as that of the present day, though the *number* of the vessels was much smaller. That is explained by the fact that the sailing vessels used in the seal fishery were included in the returns, and, being large ships, brought up the tonnage.

The use of traps has followed the decrease in number of nets and seines, but the continued increase of fishing rooms in actual use shows that there is no falling off in the prosecution of this industry. The total value of fish products for the year 1900, as shown by the Census Sheets, was \$6,282,381, as against \$9,196,138 in 1910. The following Table makes comparison with respect to the catch of salmon, herring, etc.

Taking the number of inhabited houses as above, viz.: 45,582, we find there is provision for the total population of 5.3 persons to each house. St. George has 5.9 persons to each house; St. John's West and St. Barbe, 5.8 persons; St. John's East, 5.5; Twillingate and Fortune Bay, 5.4; Bonavista,

5.3; Trinity, Burgeo and Placentia, 5.2; Burin and Bay de Verde, 5.1; Fogo and Harbor Main, 5.0; Harbor Grace, Carbonear and Ferryland, 4.8; Labrador, 4.6; and Port de Grave, 4.5 persons. These inhabited houses afford accommodation to 49,178 families, and we find that the average of the family in the Colony is 4.9 persons. It is obvious that about 3,600 of these houses have two tenements under the one roof, and thus provide for two families.

The accommodation is better than that shown by any previous Census, the average per house in 1857 being 6.8 persons; in 1869, 6.3; in 1874, 6.7; in 1884, 6.3; in 1891, 5.9; and in 1901, 5.6.

An improvement is also shown with respect to church accommodation. There is now one church to every 355 persons; whereas in 1857 there was one church to every 706 persons; in 1874, one church to every 661 persons; in 1884, one church to 509 persons; and in 1901, one church to 417 persons. Within the past decade 153 churches have been built.

P.—SHIPS AND BOATS.

Owing to absence of detail, the figures respecting sailing vessels in the following Table, for the years 1857, 1869 and 1874, must be taken to represent all vessels of whatever tonnage. There is no record of foreign-going ships, but it is not supposed that such are included in the figures given. Being a maritime people, with the riches of the seal and cod fisheries at our door, the returns of ships and boats will always be important—the increase or decrease in the figures indicating the fluctuations in the prosecution of the fisheries caused by short catches or unremunerative markets.

Q.—LAND AND THE PRODUCE THEREOF.

The particulars required under this head seem to have caused the enumerators much trouble, and it has been necessary to exercise great care in the compiling of the results. As agriculture has not been the chief aim of the majority of those occupying land, it being considered rather as an auxiliary to other employment, there was usually some difficulty in obtaining precise information upon the points set out on the Census sheets. Not that the people objected to give such information, but that they had kept no record and could give but an estimate. Some of the holdings, too, were but small and difficult to record. The general results, however, should not be far astray, and they show that our people are beginning to appreciate in a marked degree the value of the cultivation of the land. The number of acres occupied is 233,320—being not quite an acre for each inhabitant—and of these 112,604 acres are “improved.” Comparison with former Census Returns is best made by the Table which follows:—

Beside the above Live Stock there were killed for food during the year 8,445 cattle, 25,008 sheep and 8,256 swine.

S.—MINES AND MINERALS.

BELL ISLAND.—Ore produced valued at \$1,213,352 as compared with \$478,365 in 1901, and 1,900 men employed whose wages aggregate \$869,202 as compared with 1,100 men employed and wages aggregating \$225,330 in 1901.

TWILLINGATE DISTRICT.—During 1911, 34,523 tons of copper and pyrites valued at \$200,000 were brought to the surface, while in 1901 the figures were 71,610 tons valued at \$675,862. The men employed were 230 in number as compared with 573 in 1901, while the wages paid amount to \$83,000 as against \$150,411 in 1901. The falling off of the output of ore in this District is due to the closing down of Pilley's Island and the partial closing of the mine at Tilt Cove.

T.—MILLS, FACTORIES, &c.

SAW MILLS.—In 1874 there were but five saw mills in the Colony, producing 2,111 M. feet lumber. In 1884 these had increased to 55, valued at \$29,095, employing 456 persons, and producing 11,455 M. feet lumber of the value of \$148,000. In 1891 there was still a further increase. In 1901 there were 195 saw mills, valued at \$292,790, employing 2,408 persons, and pro-

ducing 43,648 M. feet of lumber, 16,197 M. shingles, and 2,020 M. laths, all valued at \$480,555. The returns of the 1911 Census are away beyond all previous statistics in relation to saw mills. There are shown to be 350 saw mills, valued at \$521,945, employing 2,685 persons, and producing 45,194 M. feet of lumber, 10,590 M. shingles, 5,162 M. laths, and 3,484 M. staves, all valued at \$661,681. Trinity Bay has the greatest number of saw mills, viz.: 174; but they are only valued at \$53,760, and produce but \$85,412 worth of lumber. Twillingate District really heads the list with 33 mills; but they are valued at \$144,500, employ 1,029 men, and turn out lumber to the value of \$325,726. Pulpwood.—The number of cords of pulpwood produced in 1911 was 59,192 valued at \$236,768. This venture which was started at Grand Falls is only in its infancy but promises to be our greatest manufacturing industry in the future. The population as shown by the Census has already reached 1,643 persons. The Anglo-Newfoundland Development Co. is spending millions of dollars to make this plant the most complete in the world.

The six tanneries produce goods to the value of \$204,000, or \$105,800 in excess of the same number of tanneries in existence in 1901. Breweries and distilleries, foundries, bakeries and furniture factories stand much as they did at the last Census.

The following table makes comparison with respect to some of the other industries in operation in the Colony:
